SEE YOU TOMORROW

We are sending our graduates out into the world with a bang. As they move on to the next chapter of their lives, we will be looking forward to their upcoming adventures as they reshape the world.

This year, the graduating students are from the bachelor's and master's programmes in the departments of Front-end Development, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Data Science, Cyber Security, Product Management, Computer Science, and Digital Transformation. In this booklet, you will find information about our graduating students and their experiences of studying at Harbour.Space Institute of Technology.

During this past year, our students have worked hard and gained experiences that allowed them to achieve substantial growth in both technical and social skills in the newly emerging fields of today. In the future, we will be looking forward to seeing them prosper in their careers!

We have created a pamphlet as a look back on your educational journey that you braved alongside us, and we hope that when you look through it, you'll remember all the great things you've accomplished during your time in Barcelona. We certainly will!

Kamran Elahian
Harbour.Space Founding Advisory Board Member, Founder and Chairman Global Innovation Catalyst LLC

Ingo Beyer von Morgenstern
Co-Founder and Chairman of Harbour.Space, Emeritus Director McKinsey & Company

We believe careers should be fulfilling, exciting, and meaningful. We exist to make this happen. Attending university is as much about finding your feet in the world and discovering your own drive and passion as it is about acquiring skills, knowledge and experience.

From day one at Harbour.Space, your prospective career takes centre stage and we facilitate your development and your networking and create opportunities to help you take charge of your future. What comes after Harbour.Space? The sky is the limit. Don't be shy, reach for the stars.

Svetlana Velikanova

Harbour.Space Institute of Technology
Co-Founder & CEO

HARBOUR.SPACE
INSTITUTE OF TECHNOLOGY

About Harbour.Space

Harbour.Space is an institute created by entrepreneurs for entrepreneurs. We focus on meeting the demands of the future, while traditional education providers are too often stuck in the past.

We're one of the only European institutions completely dedicated to technology, design and entrepreneurship, and our interdisciplinary courses are taught by some of today's leading professionals. Our aim is not only to equip students with the knowledge to take on the real world, but to nurture, create and shape tomorrow's tech superstars.

Key Facts

- Founded in 2015.
- Offers degrees in Mathematics, Computer Science, Data Science, Cyber Security, Fintech, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Product Management, Front-end Development, and Digital Transformation.
- Faculty comprised of the most accomplished professionals and industry leaders from around the world, who continuously scrutinise the curriculum to ensure students focus on realtime useful subjects.
- On our state-of-the-art campus knowledge flows freely.
- Harbour.Space programming team has won a gold medal at the International Collegiate Programming Contest (ICPC) World Finals in Luxor, Egypt, outperforming institutional giants like Stanford, MIT, Cambridge, and Oxford.

TIME ≠ MONEY

Youth is not for sale. That's why we teach highly relevant and real-world responsive courses that give students a head-start even before graduation. Our programme leaders continuously scrutinise the curriculum to ensure students focus on realtime useful subjects. We teach 3-week intensive courses throughout the year, offering more learning in less time, on flexible and adaptable schedules.

STUDENTS ARE SUPERSTARS

Harbour.Space exists for one purpose only: to help young individuals pursue knowledge, so they can progress into fulfilling and meaningful professional futures. We offer the fundamental knowledge, skills and guidance that give students the chance to make anything happen. Our students are not cogs in a machine. We celebrate our human approach by cultivating team work, interdiscipinarity, empathy and curiosity.

NO COMPROMISES

If you get a place at Harbour.Space, you get the best education. The programmes are tough and our students must work hard. We don't sell quick-fix coding or data science courses, because they don't exist. Only with very solid foundational knowledge of universal core concepts in science can students grow to move forward indefinitely, no matter how much the world around us changes.

EDUCATION REINVENTED

Leaders in business are the students' personal teachers. We don't care about titles and we don't do red tape: we hire teachers based on experience and expertise, just like in the real world. We are the most relevant tech institute of our age.

TECH ♥ DESIGN

Great ideas and their realisation seldom come from specialists: they come from all-round visionaries. But presently, technology and design are in an arranged marriage: they are together because this is what's expected. We are cultivating a love marriage between the two, and we are the only tech institute in Europe to do so. We're doing this because the two naturally depend on one another, but experience a great lack of understanding. Interdisciplinarity is our love potion — expect sparks.

Akriti Shah

India

Quote

Harbour.Space is where you truly learn and unlearn, and I'll always cherish this opportunity. Big thanks to my professors, who helped me see design in a new light, and to my classmates for their unwavering support. It's been a wild ride I won't forget. And yes—I'll forever be the one with too many tabs open, chasing ideas, deadlines, and dreams all at once.

LinkedIn

Bio

Akriti is from India with a background in Communicative English, Economics, and Political Science, and experience as a social media manager. She pursued a Master's in Interaction Design at Harbour. Space to explore where design meets technology, gaining hands-on experience in UI/UX, branding, and user-centered design. Her time there was challenging yet rewarding. She now aims to build a career in digital product design, blending strategy and storytelling to create meaningful user experiences.

Quote

Trust yourself when making life's big decisions. Sometimes, the future is uncertain, and your next move isn't obvious. You do the work upfront, calculating all possible risks. Later, hindsight can drive you mad. Just trust yourself—even if the chosen path backfired, you made the best call at the time, no doubt.

LinkedIn

Bio

Originally from Novosibirsk, Aleksandr taught computer science to secondary school students before coming to Harbour.Space to deepen his data skills. In Barcelona, he paired his studies with his lifelong passion for football, developing a data science project analyzing player performance. A Barça fan since the Guardiola era, he's now set on making data count in sports and education.

Sashenka Clémence

Switzerland

Quote

A dab a day keeps the doctor away—because mindful movement, a touch of glow, and daily discipline are the true pillars of lasting wellness.

LinkedIn

Bio

From beauty salon owner to content creator, Alexandra is always building something new. Half Swiss, half Latina, her mixed background makes her as precise as a Swiss watch and just as open-minded. Fluent in five languages, she's a communication expert—always down to spill some tea (or chisme, if you know, you know). She came to Harbour.Space to expand her knowledge in marketing and to learn in a fast-paced environment surrounded by nerds and AI experts. She's now a full-time content creator and Pilates princess.

Quote

From late-night ICPC scrims to sunrise tapas runs—thanks, HS crew, for proofs, puzzles, and endless debate. Those sessions taught me that ideas sharpen when challenged, friendships grow stronger under pressure, and the best breakthroughs arrive somewhere between exhaustion and laughter at dawn.

LinkedIn

Bio

Aleksandr Zvonarev, a Russian-born devotee of mathematics and seasoned competitive programmer, came to Harbour.Space on a Hansgrohe scholarship to sharpen his data science edge. Immersed in Barcelona's tech crucible, he deepened his love for elegant proofs and algorithmic battles. Next, he plans to dig deeper into mathematics and finance.

Allegra Glatzer

United States

Quote

During my interaction design Master's, I worked as a UX Designer with UNICEF's Giga initiative, designing data-driven tools that help governments map schools, validate geolocations, and estimate connectivity costs. My experience focused on simplifying complex datasets into usable, impactful products for global stakeholders. This opportunity helped me to learn new technologies and continue to be in a space to empower women in tech.

Bio

Originally from New York City, Allegra is a UX designer with a background in video production and editorial design, having worked at Yahoo and Fortune Media. She came to Harbour.Space to deepen her interaction design skills and work with UNICEF Giga on global connectivity tools. Her time in Barcelona broadened her creative problem-solving and strategic thinking. Next, she plans to continue designing impactful digital experiences.

Quote

If Harbour.Space taught me one thing, it's the importance of whom you surround yourself with. The only real shortcut to building exceptional products, companies, or organizations that make a difference is working alongside passionate, creative, hardworking, fun, and smart people who share a common goal. I'm glad I found that here. I'll always be grateful for the friendships and connections I've made, especially with people from countries whose names I couldn't even spell.

Bio

Born in Bolívar, Venezuela, Angelo began selling online at 14—first with a clothing brand, then other ventures that led to key wins in 2023. At Harbour.Space, he sharpened his skills in marketing, sales, finance, and product, landed his first job, and left it soon after to start his own venture. He teamed up with fellow students to launch software startups and is now focused on building and scaling products, with plans to keep launching and growing tech companies.

Anna Suvorova

Sweden

Quote

I believe white space isn't just emptiness—it's a powerful design tool. It gives our ideas room to breathe and invites clarity and emotion into every composition. Creativity often happens not in what you add, but in what you choose to leave out.

LinkedIn

Bio

Originally from Russia and having lived in four countries, Anna (Anya) brings a broad perspective to her creative work. After earning a bachelor's degree in Graphic Design in Marbella, she felt the need to go deeper. That curiosity led her to Harbour.Space, where she explored Interaction Design—not because it was her favorite field, but because it challenged her to see design beyond aesthetics. Through this, she has grown to appreciate the beauty of motion, rhythm, and user flow.

Quote

What makes this place special is the — s p a c e — it gives us: to take risks, to rethink everything, and to learn in ways that don't fit neatly on your average diploma. Shoutout to everyone who showed up with half a plan, made something real, and kept the chaos creative. You've made this place electric.

LinkedIn

Bio

Originally from Seattle, USA, Carlton led a prototyping lab in Apple's Vision Products Group before moving to Barcelona to study Interaction Design. He was drawn to Harbour.Space for its unapologetically unconventional, fast-paced structure and its emphasis on learning by doing. Surrounded by ambitious students and mentors, he found a space where ideas could evolve into reality. After graduation, Carlton plans to continue building speculative tools and better futures as a design engineer at Futurity Systems.

Davit Margaryan

Armenia

Quote

A few years ago, I couldn't imagine studying in Barcelona or having friends from all over the world. When people ask me where I see myself in five years, I don't have a simple answer, but I really hope I'll be doing something extraordinary that I couldn't imagine today.

LinkedIn

Bio

Davit Margaryan is from Armenia and began his journey in computer science through competitive programming, representing his country in numerous international Olympiads. After earning a bachelor's degree, he came to Barcelona to continue his studies in an international environment. At Harbour.Space, he widened his network with top experts in science and bright individuals from other disciplines. He might continue working in research and advanced software engineering—or he might not. No one can predict his next move.

Hesam Zakeri

Iran

Quote

There have been constant and drastic shifts in my life throughout this time, and I think its main contributor is one principle: not saying no! Many people have told me to learn to say no, but I've said yes to most things—projects, late-night plans, random trips with minimal planning, startup ideas, work opportunities. Most times I didn't know the answer but figured it out as we went along. It seems to be working out for now, so I'll be continuing for the foreseeable future.

Bio

Hesam, an Iranian raised in Tehran, studied for one year at the University of Twente in the Netherlands before transferring to Harbour.Space. He has been involved with startups and tech since high school—from creating a search engine for startups in Iran to developing video games in time crunches as short as two days, or even three hours, with friends. During his time at Harbour.Space, he joined many other ventures, ranging from consumer apps for applied AI to building a physical photo booth used during the Halloween party. He continues to explore fast-paced, hands-on projects at the intersection of software and product.

Kalista Elena Galić

Croatia

Quote

The last three years of my life were like the best roller coaster you could ever be on. Now, looking back, I honestly can't believe this was—and is—my life. I have moved cities, countries, and continents, all while being scared, only to realize that it made me fearless, because I've been fortunate enough to do it with people who made me love deeper, laugh louder, study better, party harder (thank God!), and truly open myself up to the world.

Bio

Kalista Elena was raised in Zagreb, Croatia. After finishing high school at 18, she decided to take a different path and joined Harbour.Space. Tired of the old-school way of learning, she wanted something that made sense to her—something connected to the real world. She started in Interaction Design, drawn to creativity and tech, but over time, with encouragement from her friends and teachers, she realised her skills were better suited for High-Tech Entrepreneurship. Switching tracks felt right and gave her the freedom to push herself, learn fast, and grow into the person she knew she could become.

Korlan Argynova

Kazakhstan

Quote

We're all unique, and everyone has the potential to bring value to the world. Perhaps our goal is to be brave enough to follow our heart and pursue what it tells us with all the rigor and dignity we can. Perhaps, in doing so, we'll become more humane.

LinkedIn

Bio

Korlan's mind bridges logic and creativity—she appreciates math and physics as much as writing poetry. Like a nomad from Kazakhstan, she has journeyed diverse paths: studying Automation and Control, working as a data engineer, assisting in particle physics research, and teaching Algorithms as a TA. The HS Data Science program opened the door for her to unite these interests and pursue a research career where math, physics, and algorithms meet—not to master one, but to weave them together like a story.

Master of High-tech Entrepreneurship

Sergi Laurent Sala

Spain

Quote

"La suerte es para los tontos"—that's what my sister and I used to say. It means "Luck is for the fools." I believe that luck is the outcome of OPPORTUNITY + READINESS. Your environment and your network are the best sources of opportunities. Continuous learning is how you improve your readiness. These two are what I found at Harbour. Space and what I will continue working on in the years to come. With that said, see you in Forbes :)

Bio

Sergi came to Harbour.Space after two years working at Louis Vuitton as a lean manufacturing engineer in Girona. He felt he wasn't making a real impact and lacked time for his passions—entrepreneurship, marketing, product. With a dream and all his savings, he joined Harbour.Space, where he could not only explore those interests but also find a supportive community and a network of experts and young talent. One year later, he is now launching his startup, a Pokédex for scuba divers that supports marine conservation.

Master of Digital Marketing

Sofya Arefyeva

Russia

Quote

Studying at Harbour.Space made me realize I was thinking too small. And that in most cases, your success comes from your mindset first. You can mend the reality and make it fall into place the right way, but if you feel like you don't deserve it or that you are not ready, you are setting yourself up for failure from the start.

LinkedIn

Bio

Sofya, from Russia, studied a Bachelor's degree in the UK. She came to HS because, as a bachelor's graduate, she felt unprepared for the world and lacked the skills to do her job in marketing. She came to HS to gain those practical skills.

Master of Product Management

Stephan Deriavko

Russia

Quote

All that happens is an event that either falls within your natural ability to bear or not. So if it is an event within that ability, do not complain, but bear it as you were born to. If you are outside that ability, do not complain either: it will take you away before you have the chance to make a complaint. Remember, though, that you are by nature born to bear all that your own judgement can decide bearable, or tolerate in action, if you represent it to yourself as benefit or duty.

Bio

Originally from Krasnodar, Russia, Stepan studied Business Design at IED Barcelona and the University of Westminster. At Harbour.Space, he discovered his passion for product management during the customer development course. Known for always bringing tea and clear thinking to teamwork, his goal now is to build for the real world - with innovative minds and good tea.

Master of Digital Marketing

Tawanda Mutimukulu

Zimbabwe

Quote

Seeing greatness you can reach is inspiring, but seeing greatness you think you can't reach can be discouraging. The key is shifting from "I can't" to "I will." Making that change means knowing that quality and effort are never wasted. My experience in Barcelona taught me that growth happens when you step outside your comfort zone and trust the process.

LinkedIn

Bio

Not just creative, Tawanda's got the marketing brains to put brands front and center. With a background in brand development and packaging design, he moved to Barcelona for digital marketing training at Harbour.Space Institute of Technology, where he learned to think beyond design. His time there showed him that great design happens when you understand both the creative side and how business works. Tawanda's journey began in Zimbabwe; now he's solving brand problems worldwide.Same passion, but now with even bigger impact.

Bachelor of Computer Science

Tommaso Amorosi

Italy

Quote

I started walking this path, so I might as well finish it. I knew what I was doing from day one. The follow-through will be rough, but that's fine. It's like in open-world games—when you find higher-level enemies, that usually means better loot and gear. They'll probably deck you the first time, but that's part of it. You should expect that.

LinkedIn

Bio

Tommaso discovered his passion for computer science at 15, during an IGCSE computer science class. Originally from Italy, he grew up in Ethiopia, where the course was later replaced by ITGS (Information Technology in a Global Society)—a less compelling, programming-free version. He eventually earned his IB diploma. Harbour Space put him in a forced evolution environment. He did evolve. Evolution worked. Next phase: cybersecurity. Path already set.

Master of Interaction Design

Varsharanee Roopun

Australia

Quote

Life rarely moves in straight lines. At any age, in any season, we're all just trying to make sense of things. Growth is often messy, quiet, and slow, but it's the people we meet—the honest moments we share—that make the uncertainty feel worth walking through. I hope everyone moving forward finds their paths, that they're filled with flowers, and, most importantly, that they stop to "smell the roses."

LinkedIn

Bio

With a background in marketing, entrepreneurship, teaching, and fashion design, and roots in Zimbabwe, Mauritius, and Australia, Varsharanee came to Harbour.Space to change her career path. Starting in Frontend and later shifting to Interaction Design, she's still on a journey of learning and discovery. The most valuable part has been finding real, authentic connections that feel like family.

Master of Computer Science

Victor López Roque

Cuba

Quote

Harbour.Space has been the best way to learn technology while applying it in real-world scenarios. The professors, with hands-on industry experience, made every lesson meaningful. Here, my ambition has grown and my goals have become clearer. May the knowledge we've gained help us shape the future we aspire to create.

LinkedIn

Bio

Víctor is a passionate software developer who enjoyed courses on Blockchain, Distributed Systems, and Modern Wealth Management at Harbour.Space. He worked at Giga (UNICEF + ITU), leading development of Giga-Meter, an open-source tool for monitoring school connectivity worldwide. Harbour.Space helped him grow both technically and strategically, reinforcing his mission to build impactful, socially driven tech solutions.

Master of Computer Science

Victória Cavalcante

Brazil

Quote

From Brazil to Spain, I pushed myself far beyond my comfort zone. Along the way, I met incredible people and created memories I'll carry forever. I hope my journey inspires other women in tech to be curious and ambitious.

LinkedIn

Bio

Brazilian software developer with a background in Computer Science, Victória moved from Santos to pursue her education and tech career across different regions. At Harbour.Space, she deepened her expertise in software engineering, enjoyed a multicultural environment, and developed real-world projects. Victória aims to inspire other women in tech and drive innovative solutions globally while staying true to her roots.

Master of Interaction Design

Violeta Kukic

Austria

Quote

If you remember someone constantly laughing, mispronouncing words in your language, giving brutally honest feedback—and somehow fixing bugs while doing all that—it was probably me. My teammates know I was always there to solve problems, share a laugh, or just sit down and really listen. Boring? Never an option when you worked with me.

LinkedIn

Bio

Born in Vienna with Balkan roots, Violeta holds a Bachelor's degree in Information Systems, a first Master's in Frontend Development, and is currently pursuing a second in Interaction Design. Still new to the design world, she's focused on gaining hands-on experience and developing original ideas. She chose Harbour.Space for its fast-paced, diverse, and practical approach to learning, which helped her explore entirely new areas in a short time. In the future, Violeta hopes to finish two apps she started this year.

Master of Data Science

Vladimir Morozov

Russia

Quote

Technology without purpose is useless. Purpose without technology is weak. Only when the two meet does change happen. Understand it, wield it, give it meaning—and you will have the power to make the world a better place.

LinkedIn

Bio

Vladimir left his job in sales to pursue a career in data science — learning all he could find online and applying for jobs before ultimately winning a scholarship for Harbour.Space's Master's program in Data Science, an opportunity that would dramatically impact him and his career, truly igniting the passion for this field of work. Originally a MSc in Business, he was empowered to try something new after permanently moving to Barcelona, and has not looked back ever since.
