SEE YOU TOMORROW

We are sending our graduates out into the world with a bang. As they move on to the next chapter of their lives, we will be looking forward to their upcoming adventures as they reshape the world.

This year, the graduating students are from the bachelor's and master's programmes in the departments of Interaction Design, Digital Marketing, High-tech Entrepreneurship, Computer Science, Data Sciene, and Front-end Development

In this booklet, you will find information about our graduating students and their experiences of studying at Harbour.Space@UTCC. You can also find details about the main projects they are pitching to the investors during the Demo Day.

During this past year, our students have worked hard and gained experiences that allowed them to achieve substantial growth in both technical and social skills in the newly emerging fields of today. In the future, we will be looking forward to seeing them prosper in their careers!

We have created a pamphlet as a look back on your educational journey that you braved alongside us, and we hope that when you look through it, you'll remember all the great things you've accomplished during your time in Bangkok. We certainly will!

OPEN
.SPACE

We believe careers should be fulfilling, exciting, and meaningful. We exist to make this happen. Attending university is as much about finding your feet in the world and discovering your own drive and passion as it is about acquiring skills, knowledge and experience.

From day one at Harbour.Space, your prospective career takes centre stage and we facilitate your development and your networking and create opportunities to help you take charge of your future. What comes after Harbour.Space? The sky is the limit. Don't be shy, reach for the stars.

Svetlana Velikanova

Harbour.Space Institute of Technology

Co-Founder & CEO

At Harbour.Space, we offer a balance of practical hands-on experience, frontier knowledge, and vision for future innovators. We like to think that Harbour.Space is the starting point in equipping our students with the necessary tools to shape their own futures—as well as paving the way for coming generations. We are confident that our graduates will leave the program inspired by new ideas, ready to make change in their next adventures.

We also look forward to creating a global network of future leaders who are motivated to build a compassionate world for the current and future generations. Be ready to embrace the everchanging present - the future is yours to design.

Assoc. Prof. Dr. Sauwanee Thairungroj

President

HARBOUR.SPACE
INSTITUTE OF TECHNOLOGY

About Harbour.Space Institute of Technology

Harbour.Space is an Institute of Technologycreated by entrepreneurs for entrepreneurs. We focus on meeting the demands of the future, while traditional education providers are too often stuck in the past.

We're one of the only European institutions completely dedicated to technology, design and entrepreneurship, and our interdisciplinary courses are taught by some of today's leading professionals. Our aim is not only to equip students with the knowledge to take on the real world, but to nurture, create and shape tomorrow's tech superstars.

Key Facts

- Founded in 2015.
- Offers degrees in Mathematics, Computer Science, Data Science, Cyber Security, Fintech, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Product Management, Front-end Development, Digital Transformation, and International Business.
- Faculty comprised of the most accomplished professionals and industry leaders from around the world, who continuously scrutinise the curriculum to ensure students focus on realtime useful subjects.
- On our state-of-the-art campus knowledge flows freely.

UTCC University of the Thai Chamber of Commerce

มหาวิทยาลัยหอการค้าไทย

About University of the Thai Chamber of Commerce

UTCC is defined by its commitment to foster innovation-driven entrepreneurship. It was conceived in 1940 as a private, non-profit higher education institution to offer the most modern and transformational business education.

It remains on track with this mission and is considered today as one of ASEAN's leading university in trade and services, growing alongside its community of partners in academia and industry.

Key Facts

- Accredited as a university in 1984
- Recognised as an Apple Distinguished School for 2015 - 2020
- Set up the Innovation Driven Entrepreneurship Centre (IDE) in partnership with MIT
- Integrated the Stanford course 'Designing Your Life' into its curriculum
- Offers E-commerce certification in partnership with Alibaba
- Established Harbour.Space @ UTCC campus in 2020 in Bangkok, Thailand

STUDENTS ARE SUPERSTARS

Harbour.Space exists for one purpose only: to help young individuals pursue knowledge, so they can progress into fulfilling and meaningful professional futures. We offer the fundamental knowledge, skills and guidance that give students the chance to make anything happen. Our students are not cogs in a machine. We celebrate our human approach by cultivating team work, interdiscipinarity, empathy and curiosity.

UNIVERSITY REINVENTED

Leaders in business are the students' personal teachers. We don't care about titles and we don't do red tape: we hire teachers based on experience and expertise, just like in the real world. We are the most relevant university of our age.

TECH ♥ DESIGN

Great ideas and their realisation seldom come from specialists: they come from all-round visionaries. But presently, technology and design are in an arranged marriage: they are together because this is what's expected. We are cultivating a love marriage between the two, and we are the only university in Europe to do so. We're doing this because the two naturally depend on one another, but experience a great lack of understanding. Interdisciplinarity is our love potion — expect sparks.

NO COMPROMISES

If you get a place at Harbour.Space, you get the best education. The programmes are tough and our students must work hard. We don't sell quick-fix coding or data science courses, because they don't exist. Only with very solid foundational knowledge of universal core concepts in science can students grow to move forward indefinitely, no matter how much the world around us changes.

TIME ≠ MONEY

Youth is not for sale. That's why we teach highly relevant and real-world responsive courses that give students a head-start even before graduation. Our programme leaders continuously scrutinise the curriculum to ensure students focus on realtime useful subjects. We teach 3-week intensive courses throughout the year, offering more learning in less time, on flexible and adaptable schedules.

https://www.linkedin.com/in/oeng-hongly-527ba7176/

Quote

Shout out to the friends I made along the way, teachers who guided me throughout my journey, pieces of memories, lessons, advises and guidances everyone has given me helped me grow so much in a span of 1 year, I can't thank you all enough. After school drinking sessions, sharing childhood and cultural snacks from your home countries, working together until late at night, and being inspired by everyone's hard work everyday, these are the memories I will hold close to my heart even after I graduated.

Bio

Hongly Oeng, born near the Thai-Cambodian border and raised internationally, leveraged his background in Design, Business and Technology Management. At Harbour.Space@UTCC, Hongly was surrounded by peers from all over the world, which sparked his deeper interest in how design can reflect and preserve different cultures. Inspired by diverse traditions, rituals and ways of life, he began weaving cultural narratives and heritage-based storytelling into his work, believing that good design should not only be useful, but also meaningful and rooted in identity. Looking ahead, Hongly aims to create experiences that go beyond function, crafting products and solutions that celebrate culture, memory and community, and make a lasting impact on the lives they touch.

Can't believe I've closed this chapter ; Master's degree complete, and what a wild, inspiring read it's been! From day one, Harbour.Space@ UTCC felt like a living book filled with passionate classmates, real-world lessons, and plot twists that pushed me to grow. Now it's time to write the next chapter with sharper skills, bigger dreams, and a heart full of gratitude.

Quote

I stepped into a world of new experiences—learning exciting skills, connecting with incredible people from around the globe, and immersing myself in diverse cultures. Every challenge I faced pushed me to grow—not just creatively, but personally. With every step, I've become more confident, more curious, and more connected. This journey hasn't just shaped my skills—it's shaped who I am. This year confirmed something deeply important: I'm on the right path to becoming the designer I've always aspired to be.

Bio

Rina, from Myanmar, began her career with a degree in Information Science and worked as a systems engineer, sharpening her technical skills over the years. But her passion for design kept growing, and she felt a strong pull towards creativity and innovative thinking. Determined to follow that passion, she explored design programmes around the world—until she discovered the Interaction Design programme at Harbour. Space@UTCC Institute. From the moment she found it, Rina knew it was exactly what she had been searching for. Looking back, she calls it one of the best decisions she's ever made.

Bio

Yodsaphat was born in Thailand and pursued a STEM education before joining Harbour.Space@UTCC in 2022. During his time here, he developed a strong foundation in data science through courses, international projects and internships at TKC, Unilever and LINE Man Wongnai. Inspired by real-world impact, he will continue his journey as a Data Science Intern at McKinsey & Company (QuantumBlack).

Quote

When I came to Harbour.Space@UTCC for orientation, I didn't know a single person. Now, it's hard to say goodbye. Through both individual and group projects, we always supported each other—not just to meet deadlines, but to grow and reach our goals together. This wasn't about chasing grades; it was about becoming who we wanted to be. I'm truly grateful to every instructor who guided us with more than just knowledge. They taught us how to apply what we learned, how to navigate the real world, and how to think like professionals. This journey changed my career—and changed me as a person.

Bio

Originally from Myanmar, Yu holds a Master's degree in Data Science and has a background in business. Wanting to switch to digital design, she learnt about Harbour.Space@UTCC's Interaction Design programme through alumni.
At Harbour.Space@UTCC, Yu gained hands-on experience and learnt how design professionals work in a global environment. She enjoyed collaborating with classmates from diverse backgrounds, which broadened her perspective.
Yu is grateful to her instructors for their guidance, teaching not only design skills but also how to apply them in real-world settings. Her time at Harbour.Space@UTCC has been a rewarding journey of growth, and she is excited to start her new career in digital design.
